OBJECTIVE

I am a final-year student majoring in Information Technology, having done some real projects with ReactJS and TypeScript. I have known the concepts of state, hook, function component, code-splitting, and state management with Redux. I have a solid grasp of RESTful API and can work full-time. I am looking for opportunities to develop in a professional environment to learn and contribute long-term value.

MY PROJECT

My Portfolio

-

Wedding Invitation

_

Library

-

https://portfolio-datluu.vercel.app/

- · UI/UX design with Next.js, Tailwind CSS
- · Apply dark/light mode, authenticate users with Next-auth
- · Call API, send email with template, deploy via Vercel

https://github.com/devluutiendat/wedding

- · Build the modern UI with Shadon UI and TypeScript
- Handle form submission, send email, and generate PDF via Google App Script
- · Validate data with Zod, save form to Google Sheets

https://github.com/devluutiendat/library

- · Login with Firebase, protect route with React Router
- Backend using Express + GraphQL to CRUD books and authors
- · Separate schema, mutation, query and cross-browser testing

EDUCATION

2021 - 2025

Information Technology

University of Economics - Technology - Industry

GPA 3.5

SKILLS

Professional Skills

Languages & Technologies: ReactJS, Next.js, TypeScript,

Tailwind CSS

State Management: Redux, Zustand

Backend & API: Firebase, MongoDB, REST API, ExpressJS,

GraphQL

Tools: Git, GitHub, GitLab, Postman, Jest

Foreign Language: English equivalent to 600 TOEIC

Soft Skills

Teamwork, self-study, problem solving, time management
